EDUCATION

Vellore Institute of Technology, Bhopal <i>B.Tech Computer Science Engineering – AI & ML Specialization CGPA: 8.66</i>	Bhopal, India 2023 – 2027
Podar International School <i>PCM, CBSE</i>	Pune, India 2017 – 2022
Choithram International School <i>International Baccalaureate (IB)</i>	Indore, India 2008 – 2016

EXPERIENCE

CovisionAI <i>AI/ML Intern</i> - Design, develop, and evaluate machine learning and AI models end-to-end – from data ingestion and preprocessing through training, validation, and deployment. - Collect, preprocess, and manage training datasets; enforce data quality, integrity, and confidentiality standards across all pipelines. - Write clean, version-controlled Python code and maintain technical experiment documentation to ensure reproducibility and traceability.	May 2026 – Aug 2026
Aspirant India Initiative <i>Website Developer & Reporting Manager</i> - Architected and deployed a production website for an organization impacting 40,000+ students across 500+ partner institutions; owned full lifecycle from design through post-launch optimization. - Bridged cross-functional requirements with PR, curriculum, and operations teams to ship a multi-page platform covering 9 national SDG summit events. - Led a development team of 3, managing sprint timelines, conducting code reviews, and delivering all milestones on schedule across a 5-month engagement.	Mar 2025 – Jul 2025

PROJECTS

Aurora <i>Next.js 14, FastAPI, PyTorch, XGBoost, Reinforcement Learning, SHAP</i> GitHub - Architected an AI-powered productivity dashboard using LSTM, XGBoost, and reinforcement learning to predict energy levels, detect burnout, and optimize task scheduling in real time. - Built scalable full-stack system with Next.js 14 and FastAPI; integrated SHAP-based burnout explainability and semantic task alignment via transformer embeddings.
Bone Fracture Classification <i>Python, PyTorch, ResNet18, MONAI, Computer Vision</i> GitHub - Engineered a medical image classification pipeline using ResNet18 and MONAI to classify 10 fracture types from X-ray images; mitigated class imbalance via augmentation and weighted loss functions. - Applied transfer learning and fine-tuning on clinical imaging datasets, improving diagnostic consistency and reducing manual radiologist review time.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, SQL
Frameworks: React, Next.js, Node.js, Express.js, FastAPI, TensorFlow, PyTorch, Scikit-learn
AI/ML: LSTM, CNN, ResNet18, MobileNetV2, MONAI, XGBoost, Reinforcement Learning, Computer Vision, SHAP
Cloud & Tools: AWS, Azure, Oracle Cloud, GCP, Docker, Git, Firebase, PostgreSQL, MongoDB, Linux
Libraries: NumPy, Pandas, OpenCV, Keras, Librosa, dotenv

CERTIFICATIONS

AWS Certified Solutions Architect – Associate (May 2026) | **Oracle** Cloud Infrastructure 2025 AI Foundations Associate | Applied Machine Learning in Python – **University of Michigan** | **Full-Stack Web Development** – Udemy (Node.js, Express, MongoDB)

ACHIEVEMENTS

Competitive Programming: LeetCode 1415 | CodeChef 1060 | 900+ problems solved | TCS CodeVita 2026 Global Rank 8700
Hackathons: Finalist – Dynamic Hackathon i4c (Top 400 nationally) | Shell.ai | ServiceNow | Cyber Police | All India Women Hackathon
Open Source & Leadership: GirlScript SoC 2024 & Hacktoberfest 2025 Contributor | Chairperson & EB Member at 30+ MUN conferences
Honors: Dell Champs AIR 2 (2016), AIR 3 (2015) | SilverZone French Olympiad AIR 23
